

Radio Technician/Mentor

Imagine being responsible for a radio station with no technical expertise. Many pastors and laypeople in churches are just that—in Montevideo, UY. With a burden to reach the lost through this incredible ministry, and using pre-recorded programming, these people are being faithful to God's call, while they wait for someone that He chooses to come and help them make their stations, be all they really can be!

You may be just the person! If you're are technically proficient you could be involved in helping up to fifty local churches, by helping them repair and build antennas, or providing programming and fielding their questions.

With less technical experience, you could work at the local SIM station and be trained.

Uruguay is one of the least evangelized countries in South America. It has a large presence of various Christian organizations and churches, but is strongly divided denominationally. It is the goal of SIM Uruguay to work across those denominational lines in support roles for local churches—helping them

to achieve the unity that should be the hallmark of Christ's worldwide church body.

If you think the Lord may be calling you to come to Uruguay and you have a background in radio, consider Montevideo! You have an opportunity to make a difference, not just in the lives of the local church members, but in all of those who are reached with the gospel, through this incredible ministry!

Language-Spanish Competency required (training is available).

*Rio Grande Bible Institute in Texas

*Local Berlitz School (non-resident program)

*self-directed study, by video, online services or software program.

There are no personnel to assist and oversee language learning at this time in Uruguay.
